PROJECTS

SL NO	PROJECT NAME	Technologies Use	Team size	TOOLS USED
1	Responsive online E-commerce website	JDBC,HTML,CSS Bootstrap5,JSP, JavaScript	individual	VISUAL STUDIO CODE, MYSQL Workbench, MySQL community server
2	Telephone Directory using three tier architecture	JDBC,MYSQL,Oops concept,Core java, JSP	individual	Eclipse IDE, MYSQL Workbench, MySQL community server
3	Employee management system using three tier architecture	JDBC,MYSQL,Oops concept Core java, JSP	individual	Eclipse IDE, MYSQL Workbench, MySQL community server

➢ Telephone Directory using three tier architecture

UI: Console

Functions: CRUD Operation,DQL,Join and many clauses.

Project Description:

This is a Telephone Directory software which is built on three tier architecture model. This software performs the CRUD(Create, Read, Update, Delete) Operations. The software have two interfaces one for employees and another for customers. The main feature of the software of the software is data security. Only the Boss have access to both employees and customers data, even the employees cannot access it. The software is also useful in data analysis. I use so many clauses, join and DQL's many functions that is effective program. That Program is contains various types of DQL functions.

JSP for getting the values from the user, a JSP file that processes the request and calls the methods.

it provides simple message if user is logged in, otherwise forwards the request to the login page.

➢ Employee Management System using three tier architecture

UI: Console

Functions: CRUD Operation,DQL,many clauses

Project Description:

   This is an employee management software which is built on three tier architecture model. This software performs the CRUD(Create, Read, Update, Delete) Operations. By the use of this software we can retrieve all the employee's data or we can retrieve a specific employee's data. The software is also useful in data analysis.

JSP for getting the values from the user, a JSP file that processes the request and calls the methods.

It provides simple message if user is logged in, otherwise forwards the request to the login page.

➢ Responsive Online Brand Sports Item Website

UI: Live Server

Project Description:

        My E-commerce website is based on five pages consists of home, My product, Store, Contact page, About us my introduction video and the services that I can contribute for the betterment of the society in the technical field and for the betterment of myself. The web pages are also responsive by the use of grid system.

Connected front-end and back-end we use to JSP.

JSP for getting the values from the user, a JSP file that processes the request and calls the methods.

It provides simple message if user is logged in, otherwise forwards the request to the login page.

PERSONAL DETAILS

- ❖ Father's name   Mr. Bharat Behera
- ❖ Mother's name   Mrs. Kumudini Behera
